

Geophysics

For the pre-honours years we are recommending that they follow either the activities laid on by Physics or those laid on by Earth Sciences, whichever they think looks most interesting.

For those students in honours years:

(*) David Stevenson has laid on a trip to the Eskdalemuir observatory on the Wednesday. This is for the JH year in the first instance since they asked for it. It will be opened to the SH year if there is space.

(*) The Senior honours year have to do the Enterprise Initiative Masterclass on Mon 20 and Tue 21 Feb, along with the other Earth Science SH students.

(*) The Senior honours year will give talks on their projects on Thurs 23 and Fri 24 Feb. The JH students are encouraged to attend these sessions to get them to start thinking about their own projects.
